ABOUT

Backend-focused software engineer specialized in designing scalable REST APIs, containerized microservices, and automated data processing pipelines. Experienced in secure authentication, query performance tuning, caching strategies, GCP microservice deployments, and integrating AI microservices into production workflows.

EXPERIENCE

Data Analyst — Vodafone Intelligent Solutions

Jan 2026 – Jul 2026

- Engineered an automated data-ingestion and validation pipeline to process 400K+ monthly operational telemetry records, replacing legacy manual workflows and reducing human intervention by 90%.
- Designed and deployed containerized Node.js/Express microservices on Google Cloud Run within a 3-service mesh, implementing secure server-to-server GCP IAM authentication.
- Integrated generative AI capabilities using Vertex AI (Gemini 2.5 Flash Lite), designing an Express API data pipeline that streams interaction metadata into BigQuery for real-time user engagement analytics.

Full Stack Developer Intern — Infosys Springboard

Oct 2025 – Dec 2025

- Developed secure RESTful API endpoints in Node.js/Express with JWT-based stateful authentication, implementing secure HttpOnly cookies, password hashing (bcrypt), and schema-level validation using Zod.
- Served as Team Representative: Coordinated task allocation, planning, and progress reports for a 4-developer team, translating stakeholder requirements across project phases.
- Designed and integrated full-stack features using React.js, Node.js, Express, and MongoDB, collaborating across the development lifecycle from requirement gathering to deployment.

PROJECTS

SAC Commenting – Context-Aware Analytics Collaboration Tool

Mar 2026 – Jun 2026

- Designed and developed a custom React writeback widget alternative to a \$500K proprietary solution for enterprise dashboard migration from Qlik Sense to SAC.
- Developed an embedded React widget consuming SAP Analytics Cloud postMessage events to capture dashboard context, filter selections, and user interactions.
- Engineered Context-Aware Storage: Integrated Express.js APIs and GCP KMS to encrypt and securely store comments mapped to active SAC dashboard filter states (C4 class data).
- Integrated Vertex AI services to generate contextual summaries of comments while preserving relevant business metadata through structured JSON outputs.

iConnect 2.0 – Microservice Learning Platform

Apr 2026 – Jun 2026

- Architected a decoupled microservice topology separating a Node.js/Express gateway (authentication and user management) from a FastAPI backend service, containerized and deployed on Google Cloud Run.
- Secured inter-service communication using OAuth 2.0 and Google-signed service account credentials, building structured query engines targeting BigQuery.
- Implemented a Redis transactional caching layer for recommendations and dynamic queries, reducing API response latency and redundant model invocations by 35%.

Real-Time Hand Gesture MIDI Synthesizer

Mar 2025 – Sep 2025

Link: github.com/shyamkrishnabnair/hand-gesture-recognition-mediapipe-main

- Developed a rule-based coordinate geometry classifier utilizing MediaPipe hand landmark vectors to recognize 10 finger-count gestures and real-time pinch triggers with zero ML model execution overhead.
- Optimized browser execution to achieve 60 FPS by implementing canvas frame skipping and offloading audio synthesis to multi-threaded Web Workers, minimizing audio latency buffer to ≈ 12 ms.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL **Tools:** Git, GitHub, Linux (Fedora), Docker

Backend & Web: Node.js, Express.js, FastAPI, Django, REST APIs, JWT Auth, Microservices, Zod, Prisma

Frontend & Databases: ReactJS, Vite, NextJS, Angular, PostgreSQL, MongoDB, Redis, MySQL, BigQuery

Cloud, AI & DevOps: GCP (Cloud Run, IAM, BigQuery, KMS), Vertex AI (Gemini), Prompt Engineering, CI/CD (GitHub Actions)

EDUCATION

B.E. CSE (Data Science) — Acharya Institute of Technology

CGPA: 8.7/10 | Jun 2026

- Content Head:** Innovation and Entrepreneurship Development Cells (IEDC) Acharya Institute of Technology
