ABOUT

High-agency software engineer specialized in building agentic AI workflows, LLM integrations, and containerized microservices. Experienced in multi-stage inference pipelines, structured schema outputs, RAG architectures, and optimizing Vertex AI model invocations via transactional caching across GCP infrastructure.

EXPERIENCE

Data Analyst — Vodafone Intelligent Solutions

Jan 2026 – Jul 2026

- Integrated generative AI capabilities using Vertex AI (Gemini 2.5 Flash Lite), designing an Express API data pipeline that streams interaction metadata into BigQuery for real-time user engagement analytics.
- Engineered an automated data-ingestion and validation pipeline to process 400K+ monthly operational telemetry records, replacing manual workflows and reducing human intervention by 90%.
- Designed and deployed containerized Node.js/Express microservices on Google Cloud Run within a 3-service mesh, implementing secure server-to-server GCP IAM authentication.

Full Stack Developer Intern — Infosys Springboard

Oct 2025 – Dec 2025

- Developed secure RESTful API endpoints in Node.js/Express with JWT stateful authentication, HttpOnly cookies, password hashing (bcrypt), and schema-level validation using Zod.
- Served as Team Representative: Coordinated task allocation, planning, and progress reports for a 4-developer team, translating stakeholder requirements across project phases.
- Designed and integrated full-stack features using React.js, Node.js, Express, and MongoDB, collaborating across the development lifecycle from requirement gathering to deployment.

PROJECTS

iConnect 2.0 – AI-Powered Enterprise Learning Platform

Apr 2026 – Jun 2026

- Architected a microservice topology separating a Node.js/Express gateway from a FastAPI AI inference agent, containerized and deployed on Google Cloud Run.
- Secured inter-service communication using OAuth 2.0 and Google-signed service account credentials, building structured query generation engines targeting BigQuery.
- Developed a Redis transactional caching layer that persists generated AI recommendations, reducing redundant Vertex AI model invocations by 35% and saving 200K+ daily tokens.

SAC Commenting – Context-Aware Analytics Collaboration Tool

Mar 2026 – Jun 2026

- Developed an embedded React widget consuming SAP Analytics Cloud postMessage events to capture dashboard context, filter selections, and user interactions for downstream workflows.
- Integrated Vertex AI services to generate contextual summaries of comments, utilizing prompt engineering and Pydantic-like validations to enforce structured JSON outputs for deterministic parsing.
- Built Express.js APIs and data persistence services to store comments alongside dashboard context metadata, enabling contextual rendering within SAP Analytics Cloud dashboards.
- Automated dashboard snapshot generation using Puppeteer, capturing live dashboard views and forwarding screenshots to backend AI services for contextual reporting and insight generation.

Real-Time Hand Gesture MIDI Synthesizer

Mar 2025 – Sep 2025

Link: github.com/shyamkrishnabnair/hand-gesture-recognition-mediapipe-main

- Developed a rule-based coordinate geometry classifier utilizing MediaPipe hand landmark vectors to recognize 10 finger-count gestures and real-time pinch triggers with zero ML model execution overhead.
- Optimized browser execution to achieve 60 FPS by implementing canvas frame skipping and offloading audio synthesis to multi-threaded Web Workers, minimizing audio latency buffer to ≈ 12 ms.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL **Tools:** Git, GitHub, Linux (Fedora), Docker

AI & ML: Vertex AI (Gemini), LLM Prompt Engineering, RAG, MediaPipe, Structured JSON Output, Vector Caching

Backend & Frameworks: FastAPI, Node.js, Express.js, Django, REST APIs, JWT Auth, Microservices, Zod Schema Validation

Cloud & Data: GCP (Cloud Run, IAM, BigQuery), PostgreSQL, MongoDB, Redis, MySQL, CI/CD (GitHub Actions)

EDUCATION

B.E. CSE (Data Science) — Acharya Institute of Technology

CGPA: 8.7/10 | Jun 2026

- Content Head:** Innovation and Entrepreneurship Development Cells (IEDC) Acharya Institute of Technology
